Check out this nearly six acre, fully fenced sustainable oasis just minutes from Peace River! This well maintained one level home boasts 3 bedrooms, 2.5 bathrooms and two spacious additions adding style and function while bringing in lots of natural light! The addition on the back side of the house has a large open loft creating a great flex space. The addition on the front of the home is a year round sun room lending itself nicely to a variety of uses. The property has solar panels providing the home, shop and out buildings with power and is set up to sell excess energy back into the grid. There are many great outbuildings for additional storage with the feature being the 40x40 heated shop complete with refrigerated cold room, tool room and mezzanine. The seller has also recently added a large open air shop in front of the shop set up for welding it would also be a great spot to park and work on any large truck. The open air portion is built with steel beams and cedar timbers below a metal roof creating potential to add a overhead crane if desired. The parking pads are also extensively graveled and the secure yard is ready to handle large trucks. The yard is complete for all around sustainability with 2 oversized greenhouses, large garden and a productive berry patch. The garden and green houses are self watering and there is a wood stove in ready to use on the colder nights. The berry patch is planted in sand and is poly lined to hold in moisture without the weeds for low maintenance and high production! A small older home was brought on the property with the intention to set up a u-pick or market garden store. If that's not enough there is also a small pasture in the back ready for use. Depending on your consumption there is potential to produce enough power to offset all of your utility costs! This well established acreage is a must see, book an appointment today! 360

virtual tour is now available in the media section, floor plans available in the photos section.
